About

I am an ambitious and driven Part II Architectural Assistant looking to expand my knowledge ahead of becoming a qualified architect. Architecture's influence on society and its role in everyone's life has fuelled my desire to become an architect and to contribute to the industry. I bring energy and creativity into everything I do, always looking for interest as well as function in design, I continue to push myself to learn for myself and from those around me. I am a hardworking, diligent individual, comfortable working on my own or as part of a team. I work efficiently to maintain a healthy working balance which I feel is vital to maintaining my high standards and quality work. I enjoy keeping active playing football and golf as well as travelling, exploring different cultures and their architectural solutions compared to ours. I believe in a holistic approach to design, architecture should sit harmoniously with its context, socially, economically and geographically, given its broader influence on society
